PROFESSIONAL SUMMARY

Fullstack Developer with 3+ years of experience designing, developing, and deploying scalable web and operational systems across healthcare, enterprise, and service-based industries. Experienced in building end-to-end business solutions including workflow management, asset monitoring, project collaboration platforms, and dynamic CMS-driven applications using modern frontend and backend technologies. Strong understanding of system architecture, operational workflows, and user-focused application development.

SKILLS

Frontend

Vue.js, Nuxt.js, jQuery, PHP

Backend

Node.js, Express.js, CodeIgniter

Mobile

Flutter, Apache Cordova, Framework7

Database

PostgreSQL, MySQL, Firebase

Tools & Others

Prisma ORM, REST API Development, Git (version control & deployment), JWT Authentication, Docker (basic), MVC / Layered Architecture

WORK EXPERIENCE

PT Ekosistem Kesehatan Indonesia (Nexmedis)

Frontend Developer (Previously Fullstack Developer)

 Dec 2024 – Apr 2026

- Developed and maintained multiple healthcare system modules, including patient registration, outpatient and inpatient management, ICU monitoring, and laboratory systems
 - Implemented BPJS and PCare integration for national healthcare insurance workflows
 - Built medical record features including CPPT (doctor & nurse notes), patient history, and clinical documentation
 - Developed printing and reporting features for medical records and lab results
 - Integrated third-party systems to ensure seamless data exchange across healthcare services
 - Contributed to system scalability and reliability in a complex healthcare environment
-

PT Persada Solusi Data

Fullstack Developer & Project Lead

 May 2023 – Dec 2024

- Led end-to-end development and deployment of multiple enterprise web applications and operational systems for company-wide usage
- Developed **AMMS (Administration Monitoring Management System)**, a maintenance and workforce monitoring platform featuring role-based access control, work assignment workflows, overtime tracking, labor cost calculation, spare part management, and employee activity reporting
- Built **PMT (Project Management Tools)**, a collaborative project management platform with task assignment, drag-and-drop workflow management, team discussions, reminders, file attachments, and deadline tracking features
- Developed **PAMS (Persada Asset Management System)** for enterprise asset monitoring, including barcode generation, audit scanning workflows, asset verification, approval systems, and branch-level reporting
- Designed interactive dashboards and customizable UI themes to improve employee engagement and overall user experience across internal systems
- Managed application deployment, troubleshooting, system maintenance, database backups, and version control across multiple ongoing projects while ensuring system stability, security, and operational reliability

- Collaborated directly with stakeholders to translate operational workflows and business requirements into scalable technical solutions
 - Supported CCTV monitoring infrastructure and related operational services as part of broader IT responsibilities
-

PT Disty Technology Indonesia

Fullstack Developer & Project Lead

 Feb 2022 – Aug 2022

- Led hospital queue system development
 - Built mobile applications using Firebase
 - Managed client communication and requirements
-

PT Telkom Witel Surabaya V

Web Developer

 Feb 2018 – Aug 2018

- Developed internal systems and handled data management

FREELANCE PROJECT

Zyramuz.site

- Developed and maintained a scalable **Laundry Management System** with integrated landing page marketing and dynamic CMS configuration for business owners and administrators
- Built operational workflows for laundry pickup and delivery services, including urgency-based order handling and dynamic service configuration
- Implemented role-based access control (ACL), audit trail logging, and centralized system configuration management for operational transparency and security
- Developed customer loyalty and voucher management systems with configurable point conversion, voucher types, expiration settings, and promotional rules

- Integrated dynamic payment management supporting cash, virtual accounts, and QRIS payment methods with configurable enable/disable controls
- Designed reporting and analytics dashboards featuring transaction summaries, customer review reports, charts, filtering, and import/export functionality
- Implemented distance-based delivery fee calculations and dynamic pricing configurations based on operational business rules
- Added customer communication integrations including WhatsApp-based transaction support and automated transaction detail sharing for operational staff

EDUCATION

University of 17 Agustus 1945 Surabaya

 2019 - 2023

Institut Teknologi Sepuluh Nopember
